

The Next Generation of Simulation Suites

Blended Learning Interactive Simulation Suite

www.simovation.com.au

Simovation Interactive Technologies

We can supply and install the latest in interactive simulation suites.

The next generation of BLISs sim suites are dynamic, engaging, interactive and filled with clinically relevant interactive content using the latest high quality hardware.

A room that provides the faculty with a powerful and easy to use robust software package linked with a uniquely intuitive touch capability.

Simovation will build a hybrid learning simulation experience for your students without boundaries or limitations.

Integrate our BLISs solution with you audio visual solution and you can now deliver high quality education to a global audience.

We Create Content

With additional protocol and procedure content provided to enhance student confidence and technical skills as well as clinical information and learning.

Creating infinite possibilities for learning in the correct clinical environment.

We will also teach you to create your own content.

You Create Content

We Create Spaces

Though the interactive experiences we provide, students gain accelerated learning by being transported into environments where they can practise their critical care skills within a safe environmental context.

You can also create your own environments that we will help you develop

You Create Spaces

SIMOVATION

INTERACTIVE TECHNOLOGIES

All our bundles come with:

- * A perpetual model for the development of content via a shared secure cloud based system accessible from any device.
- * Fantastic supported training / academy packages
- * Excellent perpetual graphic and content support
- * An invaluable warranty cover
- * Full online IT support

01

Ideal for clients who already have a room yet want to get more than just pictures on walls and a few moving images. Clients who recognise the value of their simulation room but need it to deliver more. Then why not upgrade to our perpetual software model that includes the development of content and a shared secure cloud based system with added training and support facilities. simply tells us your current room size and let us do the rest.

02

Got the perfect room and someone who can create the internal space to our specification? then you need our Software and Hardware Bundle.

Provide us with you room dimensions, contact details of your preferred contractor and we can organise your entire installation remotely, and follow up with our quality training and support.

03

Got the space but don't want the hassle of organising contractors then let us design and install your perfect room for you. Most installations are completed within 7 to 10 working days with minimum disruption. Once installed we will provide you with our comprehensive training and development support packages.

04

Looking for a temporary or removable room then why not consider a Gener8 pod. Easy to install in less than 3 hours incredibly robust, high quality with a striking graphic design and your logo. Ideal for swapping between sim centres and locations to maximise student and users coverage.
